The policy and procedure manual is essential to the efficient operation of every medical practice. Its purpose is multifaceted: to serve as a training and orientation guide for new employees, to serve as an ongoing reference for staff, and to serve as a risk management tool that lowers liability exposure in the office.

This publication is in template form to help you develop a policy and procedure manual for your medical practice. For the manual to be effective you must keep it current and you must share it with your entire staff. Above all, you must implement and enforce the policies and procedures contained in your manual!

This manual is intended to serve the needs of small practices in North Carolina. If you are a mental health provider, your practice conducts research, is involved in unusual marketing activities, or is a clinical facility located on the employer’s site, you should make appropriate inquiries regarding additional HIPAA considerations that are beyond the scope of this manual.

The publication is designed to provide general information in regard to the subject matter covered and is provided with the understanding that the authors are not engaged in rendering legal, medical, or other professional services. Although prepared by professionals, information provided in this handbook should not be utilized as a substitute for professional services in specific situations. If you require coding, legal, medical, or other expert advice, you should seek the services of a professional at that time.

The North Carolina Medical Society wishes to acknowledge and thank the Texas State Medical Society for its contributions to this manual. The Society also wishes to acknowledge the law firm Smith, Anderson, Blount, Dorsett, Mitchell & Jernigan, L.L.P. for its contributions and editorial services in the preparation of this manual. If there are questions beyond the scope of this manual, please direct them to Robin K.
