Message from the Program Chair

Welcome to the first annual **Raab** multidisciplinary symposium in cancer care. Mary and Spencer Raab founded the division of hematology/oncology at ECU's fledgling medical school in 1977. Together they developed the division into a robust clinical enterprise which has evolved to support an expansive region of 1.5 million people and a training program which graduates four hematology/oncology fellows per year.

The purpose of this yearly symposium is to provide comprehensive and state of the art evidence-based data from each discipline involved in the care of a specific disease site. Featuring the insight of nationally recognized leaders from all disciplines combined with regional experts in the field, the focus of this year's conference is **malignant melanoma**. Our intent is to provide you with treatment recommendations for common presentations during the speaker's program and expert guidance for more challenging cases presented in the panel discussion at the end of the day. The Raab Professorship for Adult Oncology helps to fund this conference with the specific intent of continuing the legacy established by Mary and Spencer of improving care and outcomes of patients with cancer in eastern North Carolina.

Spencer Raab, MD

Mary Raab, MD

Target Audience

This conference has been planned for Oncologists, Ophthalmologists, Pathologists, Surgeons, Internal Medicine and Primary Care Providers, Nurse Practitioners, Physician Assistants, Nurses, Pharmacists and other health care providers involved in the care of melanoma patients.
