

Dear North Carolina General Assembly Members,

On behalf of all the listed physician specialty societies, county medical societies, and the North Carolina Medical Society, **we request that you oppose to HB 277 / SB 249 - The SAVE Act.**

These bills would allow Nurse Practitioners (NP), Certified Registered Nurse Anesthetists (CRNA) and Certified Nurse Midwives (CNM) to practice without the supervision of a physician, essentially creating the authority for the independent practice of medicine.

These professions are essential components of a patient care team, but are not trained to practice independently. Education, training, and experience are essential in health care decision making. Ignoring the need for additional training when providing additional authority puts patients at risk.

Coordinated care should be our top priority, not fragmented independent practice. Patients in rural and underserved areas deserve to have access to quality care. We believe this model of care promotes the improved patient outcomes and allows us to deliver more efficient and cost-effective health care to your constituents.

Our members serve the patients in your district each day and want to ensure safe, quality care to each of your constituents. Again, this requires the team working together, not in silos. Therefore, we request that you oppose HB 277/SB 249 – The SAVE ACT.

Thank you,

North Carolina Medical Society
